SAFETY DATA SHEET

040 – 19

Neon Coloured Acrylic Nail Art & Dipping Powders

Date issued: 06.02.2017

This safety data sheet conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 453/2010 -Europe

Section 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name: Neon Coloured Acrylic Nail Art & Dipping Powders

Product code: COL16, COL24, COL31, COL42, COL45, COL63

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of substance / mixture: For use with acrylic nail liquid to be applied on nail overlays as nail art and decoration and for use with nail dipping system over a base layer

1.3. Details of the supplier of the safety data sheet

Company name: Nail and Beauty excellence 145 High Street
Hythe
Kent

CT21 5JL
United Kingdom
Tel: 01303311694
Email: info@nailandbeautyexcellence.com

1.4. Emergency telephone number: Emergency tel: 07881421521

Nail and Beauty Excellence, 145 High Street, Hythe, Kent CT21 5JL United Kingdom Email: info@nailandbeautyexcellence.com Tel: +44 01303 311694

VAT No: 3266738979 Company Registration No: 12028916

Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

Section 2: Hazards identification:

2.1 Classification of the substance or mixture:

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Sens. 1, H317

Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Ingredients of unknown toxicity:	Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 100%
Ingredients of unknown ecotoxicity:	Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 100%

See Section 16 for the full text of the R phrases or H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements:

Hazard pictograms:

Signal word: Warning

Hazard statements: May cause an allergic skin reaction.
Toxic to aquatic life with long lasting effects.

Precautionary statements:

General:	N/A.
Prevention:	Wear protective gloves. Avoid release to the environment. Avoid breathing dust.
Response:	IF ON SKIN: Wash with plenty of soap and water, if skin irritation or rash occurs, seek medical attention.
Storage:	N/A.
Disposal:	Dispose of contents and containers in accordance with all applicable regulations / laws.
Supplemental Label Elements:	N/A.
Annex XVII Restrictions:	N/A.
Special Packaging Requirements:	N/A

Nail and Beauty Excellence, 145 High Street, Hythe, Kent CT21 5JL United Kingdom Email: info@nailandbeautyexcellence.com Tel: +44 01303 311694

VAT No: 3266738979 Company Registration No: 12028916

Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

2.2 Other Hazards: Fine dust clouds may form explosive mixtures in air. Handling / or processing of this material may mechanical irritation of the eyes, nose, skin and throat.

Section 3: Composition/information on ingredients:

Substance / Mixture: Mixture.

Product / Ingredient Name:	Inci Name	Identifiers	%	Classification: Reg' (EC) No. 1272/2008 [CLP]	Type
Titanium Dioxide	Titanium Dioxide	EC: 236-675-5 Cas: 13463-67-7	0-5	Aquatic Chronic 2, H411	[1]
Dibenzoyl Dioxide		EC: 202-327-6 CAS: 94-36-0 Index: 617-008-00-0	0-5	Org Peroxide. B H241 Skin Irrit'. 2, H315 Eye Irrit'. 2, H319 Skin Sens' 1, H317 Aquatic Acute. 1, H400 Aquatic Chronic. 1 H410	[1]

Type Classifications:

- [1] Substance classified with a health or environmental hazard.
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT, Reg' EC No' 1907/2006 Annex XIII
- [4] Substance meets the criteria for vPvB, Reg' EC No' 1907/2006 Annex XIII
- [5] Substance of equivalent concern

There are no additional ingredients present which, within the current knowledge of the supplier are classified and contribute to the classification of the substance and hence require reporting in this section.

There are no additional ingredients which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBT's or vPvB's or have been assigned a workplace exposure limit and hence require reporting in this section.

Occupational exposure limits, if available or applicable are available in section 8.

Section 4: First aid measures

4.1 Description of first aid measures:

General Advice:

Provide the SDS to medical personnel for treatment.

Inhalation:

Remove the victim to the fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained professional. It may be dangerous to the person providing aid, to give mouth to mouth resuscitation. Get medical attention if adverse medical effects are severe or persist. If unconscious, place in the recovery position and get medical attention immediately. Maintain an open airway and loosen any tight clothing such as a collar, tie, belt or

waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Eye Contact:

Immediately flush eyes with plenty of water, occasionally lifting the lower and upper eyelids. Check for and remove any contact lenses (if safe to do so). Continue to rinse for at least ten minutes, get medical attention if irritation occurs.

Skin Contact:

Wash with plenty of soap and water, remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing, or wear gloves. Continue to rinse for 10 minutes. Get medical attention, in the event of any complaints or symptoms, avoid further exposure. Wash clothing before re-use.

Ingestion:

Wash out the mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in the recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Protection of First Aiders:

No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth to mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

4.2 Most important symptoms and effects, both acute and delayed:

Potential acute health impacts:

Eye Contact:	Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.
Inhalation:	Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose throat and lungs.
Skin Contact:	May cause an allergic skin reaction.
Ingestion:	no known significant effects or critical hazards.

Over-exposure signs / symptoms:

Eye Contact:	Adverse symptoms may include the following: Irritation, redness.
Inhalation:	Adverse symptoms may include the following: Respiratory tract irritation, coughing.
Skin Contact:	Adverse symptoms may include the following: irritation, redness.
Ingestion:	No Specific Data.

4.3 Indication of any immediate medical attention and special treatment needed.

Notes to Physician: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48hrs.

Specific Treatments: No specific treatment.

Section 5: Fire-fighting measures:

5.1 Extinguishing Media:

Nail and Beauty Excellence, 145 High Street, Hythe, Kent CT21 5JL United Kingdom Email: info@nailandbeautyexcellence.com Tel: +44 01303 311694
VAT No: 3266738979 Company Registration No: 12028916
Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

Suitable Extinguishing Media:

Use dry powder chemical

Unsuitable Extinguishing Media

Do not use water jet

5.2 Special hazards arising from the substance or mixture:

Hazards from the substance or mixture:

Fine dust clouds may form explosive mixtures with air. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged into any waterway, sewer or drain.

Hazardous thermal decomposition products:

Decomposition products may include the following materials: carbon dioxide, carbon monoxide, nitrogen oxides, sulphur oxides, halogenated compounds, metal oxide / oxides.

5.3 Advice for firefighters:

Special protective actions for fire fighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire exposed containers cool.

Special protective equipment for fire fighters:

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full-face piece helmet, operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN469 will provide a basic level of protection for chemical incidents.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures.

For non-emergency personnel:

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources, no flares, smoking or flames in the hazard area. Avoid breathing dust. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders:

if specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

6.2 Environmental Precautions:

Avoid dispersal of spilt material, runoff and avoid contact with; soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

6.3 Methods and material for containment and cleaning up.

Nail and Beauty Excellence, 145 High Street, Hythe, Kent CT21 5JL United Kingdom Email: info@nailandbeautyexcellence.com Tel: +44 01303 311694

VAT No: 3266738979 Company Registration No: 12028916

Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

Small spill:

Move containers from spill area. Use spark proof tools and explosion-proof equipment. Avoid dust generation. Using a vacuum with a HEPA filter will reduce dust dispersal. Place spilled material in a designated, labelled container. Dispose of via a licensed waste disposal contractor.

Large spill:

Move containers from spill area. Use spark proof tools and explosion proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation, do not sweep, vacuum dust with equipment fitted with a HEPA filter and place in a closed labelled container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor.

6.4 References to other sections:

See Section 1 for emergency contact information.

See Section 8 for information on appropriate Personal Protective Equipment.

See Section 13 for additional waste treatment information.

Section 7: Handling and storage:

7.1. Precautions for safe handling:

Protective measures:

Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing dust. Avoid release to the environment. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2. Conditions for safe storage, including any incompatibilities:

Do not store above the following temperature: 30°C (86°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Seveso II Directive - Reporting thresholds (in tonnes) Danger criteria:

Category	Notification and MAPP Threshold	Safety report threshold
----------	---------------------------------	-------------------------

VAT No: 3266738979 Company Registration No: 12028916

Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

E2: Hazardous to the aquatic environment - Chronic	200	500
--	-----	-----

7.3 Specific end use(s)

Recommendations:

Not available

Industrial sector specific solutions:

Not available

Section 8: Exposure controls/personal protection:

Occupational exposure limits:

No exposure limit value is known.

Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs.

No DNELs/DMELs available.

PNECs.

No PNECs available

8.2 Exposure controls

Appropriate engineering controls

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosionproof ventilation equipment.

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye Face Protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following

protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. If operating conditions cause high dust concentrations to be produced, use dust goggles.

Skin protection:

Hand Protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Body Protection:

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other Skin Protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory Protection:

Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Environmental exposure controls:

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Section 9: Physical and chemical properties:

9.1 information on basic physical and chemical properties:

Physical state:	Solid (powder).
Colour:	Various.
Odour:	Faint Odour
Melting point / freezing point:	N/A.
Initial boiling point and boiling range:	N/A.
Flash Point:	Closed cup:304°C (Tagliabule) (Product does sustain combustion)
Vapour Pressure:	N/A.
Vapour Density:	N/A.
Relative Density:	N/A.
Solubilities:	Insoluble in cold and hot water.
Auto-ignition Temp':	N/A.
Decomposition Temp':	N/A.

Nail and Beauty Excellence, 145 High Street, Hythe, Kent CT21 5JL United Kingdom Email: info@nailandbeautyexcellence.com Tel: +44 01303 311694

VAT No: 3266738979 Company Registration No: 12028916

Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

Viscosity: N/A

9.2 Other information:

No additional information

Section 10: Stability and reactivity:

10.1 Reactivity: No specific test data related to reactivity available for this product or its ingredients.

10.2 Chemical Stability: The product is stable.

10.3 Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid: Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation.

10.5 Incompatible materials: Reactive or incompatible with the following materials: oxidising materials.

10.6 Hazardous decomposition: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11: Toxicological information:

11.1 information on toxicological effects

Acute toxicity:

Product / ingredient	Result	Species	Dose	Exposure
Dibenzoyl peroxide	LD50 oral	Rat	6400 mg/kg	--

Acute toxicity estimates:

Not Available

Irritation / Corrosion:

Product / ingredient	Result	Species	Score	Exposure	Observation
Titanium Dioxide	Skin -mild Irritant	Human	--	72 hrs, 300 micrograms, intermittent	--
Dibenzoyl Peroxide	Eyes - Mild Irritant	Rabbit	--	24hrs 500 milligrams	--
	Skin - Severe irritant	Human	--	1344 hrs 5 percent	--
	Skin – Moderate Irritant	Human	--	Intermittent 1 percent	--

Information on the likely routes of exposure:

Not available.

Potential acute health effects:

Nail and Beauty Excellence, 145 High Street, Hythe, Kent CT21 5JL United Kingdom Email: info@nailandbeautyexcellence.com Tel: +44 01303 311694

VAT No: 3266738979 Company Registration No: 12028916

Registered Company Address: 30 Shearway Business Park, Shearway Road, Folkestone, Kent CT194RH United Kingdom

Eye Contact: Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.

Inhalation: Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose throat and lungs.

Skin Contact: May cause an allergic skin reaction

Ingestion: No known significant effects or critical hazards.

Symptoms related to the Physical, Chemical and toxicological characteristics.

Eye contact: Adverse symptoms may include the following: irritation, redness

Inhalation: Adverse symptoms may include the following: respiratory tract irritation, coughing.

Skin Contact: Adverse symptoms may include the following: irritation, redness.

Ingestion: No specific Data.

Delayed and immediate effects and also chronic effects from short and long term exposure.

Short term exposure:

Potential immediate effects: Not Available.

Potential delayed effects: Not Available.

Long term exposure:

Potential Immediate effects: Not available.

Potential delayed effects: Not available.

Potential chronic health effects:

Not available.

General: Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation. Once sensitised, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity: No known significant effects or critical hazards.

Mutagenicity: No known significant effects or critical hazards.

Teratogenicity: No known significant effects or critical hazards.

Developmental effects: No known significant effects or critical hazards.

Fertility effects: No known significant effects or critical hazards.

Other Information: Not available.

Section 12: Eco logical information:

12.1 Toxicity:

Product / Ingredient	Result	Species	Exposure
-------------------------	--------	---------	----------

Titanium Dioxide	Acute LC50 3 mg/l Fresh water	Crustaceans - Ceriodaphnia dubia – Neonate	48hrs
	Acute LC50 6.5 mg/l Fresh water	Daphnia - Daphnia pulex Neonate	48hrs
	Acute LC50 >1000000 µg/l Marine water	Fish - Fundulus heteroclitus	96hrs
Dibenzoyl Peroxide	EC50 0.83 mg/l EC50 0.07 mg/l LC50 2.00 mg/l	Algae Daphnia Fish	72hrs 48hrs 96hrs

12.2 Persistence and degradability:

Product / ingredient	Test	Result	Dose	Inoculum
Dibenzoyl peroxide	--	60% - 28 Days	--	--

Product / Ingredient	Aquatic Half	Photolysis	Biodegradability
Dibenzoyl peroxide	--	--	inherent

12.3 Bio accumulative potential:

Product / Ingredient	Log P _{ow}	BCF	Potential
Titanium dioxide	--	352	Low
Dibenzoyl peroxide	3.2	--	Low

12.4 Mobility in soil:

Soil / water partition Coefficient (K_{oc}): Not available

Mobility: Not available

12.5 Results of PBT and vPvB assessment:

PBT: Not applicable.
vPvB: Not applicable.

12.6 Other adverse effects:

No known significant effects or critical hazards

Section 13: Disposal considerations:

Waste treatment methods:

Product:

Methods of disposal:

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous Waste:

The classification of the product may meet the criteria of a hazardous waste.

Packaging:

Methods of disposal:

The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Special Precautions:

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14: Transport information

Not regulated, for Road Air or Sea transport.

Note for section 14.6 Special precautions for user: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Section 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture:

EU Regulation (EC) No. 1907/2006 (REACH)
Annex XIV – List of substances subject to authorisation
Annex XIV:

None of the components are listed.

Substances of very high concern:

None of the components are listed.

Annex XVII – Restrictions on the manufacture placing on the market and use of certain dangerous substances mixtures and articles:

Not applicable.

Other EU regulations:

Europe Inventory: Not determined.

Seveso II Directive: This product is controlled under the Seveso II Directive

DANGER CRITERIA

Category
E2: Hazardous to the aquatic environment – Chronic 2

15.2. Chemical Safety Assessment:

This product contains substances for which chemical Safety Assessments are still required.

Section 16: Other information:
